

AARON D. BLACKWELL

Department of Anthropology | Washington State University, Pullman, WA
Email: aaron.blackwell@wsu.edu | Website: Blackwell-lab.com

RESEARCH INTERESTS

Using life history theory and evolutionary ecology as frameworks for understanding human physiology, behavior, and health.

PROFESSIONAL SPECIALIZATIONS

- Human ecological immunology
- Human growth and development
- Human reproductive ecology
- Behavioral ecology and life history theory
- Evolutionary parasitology and disease ecology
- Health of Amazonian populations

EDUCATION

- | | |
|-----------|--|
| 2006-2009 | PhD. Biological Anthropology, University of Oregon, Eugene, OR,
Dissertation: Life history trade-offs in growth and immune function |
| 2004-2006 | MA. Biological Anthropology, University of Oregon, Eugene, OR. |
| 1996-2000 | BA. Biochemistry, Minor: English, <i>cum laude</i> . Lewis and Clark College,
Portland, OR. Overseas Study in Kenya (Spring 1998) |

PROFESSIONAL POSITIONS

- | | |
|--------------|---|
| 2018-Present | Associate Professor , Department of Anthropology, Washington State University, Pullman, WA. Director, Human Biology |
| 2012-2019 | Associate Professor , Department of Anthropology, University of California, Santa Barbara, CA. (Promotion from Assistant Professor in 2017). |
| 2012-2018 | Director , Human Ecological Immunology Laboratory, University of California, Santa Barbara, CA; Co-director , Human Biodemography Laboratory, University of California, Santa Barbara, CA |
| 2016-2018 | Affiliated Scholar , Department of Human Behavior, Ecology, and Culture, Max Planck Institute for Evolutionary Anthropology, Leipzig, Germany |
| 2010-2012 | Postdoctoral Scholar , Institute for Social, Behavioral and Economic Research, University of California, Santa Barbara, CA, Mentor: Michael Gurven |
| 2007-2009 | Summer Instructor , Department of Anthropology, University of Oregon, Eugene, OR |
| 2004-2009 | Graduate Teaching Fellow , Departments of Anthropology and Biology. University of Oregon, Eugene, OR |
| 2004-2007 | Statistical Consultant , Blackwell Consulting, Eugene, OR |

2003-2004	Research Associate/Study Coordinator , Mood Disorders Research Center / Hepatitis C Resource Center, Portland VA Medical Center, Portland, OR,
2000-2001	Research Assistant , Department of Cell and Developmental Biology, Oregon Health and Science University, Portland, OR

GRANTS AND FUNDING

2020	NSF Cultural Anthropology BCS-1945740/1945725: Collaborative Research: Disentangling the effects of extrinsic mortality risk and energy availability on adolescent maturation (PIs: Aaron Blackwell, Carolyn Hodges-Simeon, Angela Garcia \$398,464; Start date: Sept 15, 2020.)
2019	NSF Dissertation Improvement Grant: “Doctoral Dissertation Research: The effects of porous cranial lesions on adult health and the evidence for childhood anemia-driven skeletal changes in a living Amazonian subsistence” (PIs: Aaron Blackwell, Michael Gurven, Co-PI: Amy Anderson: \$31,044)
2017	Funding from Max Planck Institute to UCSB for “Behavioral Flexibility in an Invasive Species: Functions, Mechanisms, Invasion Ecology, and Genetics” (PIs: Corina Logan and Aaron Blackwell: \$239,979)
2017	Wenner-Gren Foundation, “Do Neuroendocrine-Immune Interactions Mediate Links Between Social Disparities and Metabolic Risk among Honduran Immigrant Women?” (PI: Angela Garcia, Supervisor: Aaron Blackwell: \$20,000)
2015	NIA/NIH bridge funding for <i>The Human Life Course and the Biodemography of Aging</i> R01 AG024119 (PIs Hillard Kaplan and Michael Gurven: \$590,660)
2014	Hellman Family Foundation Award: “Validation of Field Friendly Methods for Measuring Immune Function” (PI: Blackwell: \$29,100)
2014	UCSB Faculty Career Development Award
2013	UC Regents Junior Faculty Fellowship
2011	NIA/NIH Immunosenescence supplement to <i>The Human Life Course and the Biodemography of Aging</i> R01 AG024119 Role: Primary investigator for the immune component of the larger project (PIs: Hillard Kaplan and Michael Gurven: \$1,890,110)
2009	Betty Foster McCue Fellowship
2008	NSF Dissertation Improvement Grant BCS-0824602: “The effects of parental investment and market integration on growth and immune function in an indigenous Amazonian population” (\$14,974)
2007-2008	Sasakawa Young Leaders Fellowship (\$12,000)
2006	Institute of Cognitive and Decision Sciences Research Grant (\$500)

HONORS AND AWARDS

2012	New Investigator Award - Evolutionary Anthropology Society
2009	Malcolm McFee Paper Award (University of Oregon)
2006	L.S. and D.C. Cressman Paper Prize (University of Oregon)
2006	Best Graduate Student Paper, NW Anthropological Conference, Seattle, WA

2003	Team of the Year, Hepatitis C Resource Center (Portland VA Medical Center)
2003	Team of the Month (December), Hepatitis C Resource Center (Portland VA)
2000	Phi Beta Kappa
1999	John S. Rogers Science Research Fellow (Lewis and Clark College)
1997	Robert B. Pamplin Society of Fellows (Lewis and Clark College)

SELECT PAPERS IN PREPARATION

Blackwell, AD and Anderson, A. boneMachine: An R Package for Rotation and Analysis of DICOM and Other Three-Dimensional Data. In prep for *Journal of Statistical Software*

CURRENT RESEARCH PROJECTS

Disentangling the effects of extrinsic mortality risk and energy availability on the timing of human pubertal events in Honduras. Utila is an island off the coast of Honduras with an eclectic history. The island measures only 11 km by 4 km, yet is home to a number of distinct social and ethnic groups. These include Spanish-speaking mestizo immigrants from the mainland, Utilian descendants of British and Americans who settled in the late 19th century, and ex-pats who come to Utila from the United States and elsewhere for dive tourism. The unique context of Utila provides a natural experiment for examining how social differences and different developmental histories impact on the health of different individuals living in the same environment. This study will examine the contributions of energy availability, disease, and cues of mortality risk on the timing and pace of pubertal development in boys and girls in Utila and mainland Honduras. PIs: Carolyn Hodges-Simeon, Aaron Blackwell, Angela Garcia

Impacts of Economic Development on Psychosocial Stress and Cortisol among Honduran Immigrants and Native Islanders on Utila. This study in Utila examine how psychosocial

stress relates to diabetes and hypertension risk, the impact of stress and disease on immune function, and the relationships between cultural history and identity and health. PIs: Angela Garcia and Aaron Blackwell

Immune function, disgust sensitivity, and personality. Investigates associations between immune function, behavioral disgust responses, and future orientation. Posits that baseline immunity should relate to disgust sensitivity, with poorer defenses against viral threats associating with more disgust from interpersonal disease threats, and poorer defenses against parasites and bacteria associating with disgust to food and dead animals. PI: Aaron Blackwell

The Tsimane Health and Life History Project is a joint health and anthropology project aimed at understanding the impacts of ecology and evolution on the shaping of the human life course. The project focuses on the health, growth and development, aging, economics and biodemography of small-scale populations of hunter-gatherers and horticulturalists. It combines biomedical and anthropological research with medical attention among Tsimane, an indigenous forager-farming group living in central lowland Bolivia in the Beni Department. Role: Co-investigator. PIs: Hillard Kaplan (University of New Mexico) and Michael Gurven (University of California, Santa Barbara). Website: <http://www.unm.edu/~tsimane/>

Trade-offs in Cognitive Ability, Physical Quality, and Immune Function in Great-tailed Grackles (*Quiscalus mexicanus*). The project will use a variety of immune function and behavioral measures to assess trade-offs and correlations between cognitive ability, physical characteristics and immune function in grackles across their North American range, in order to examine how individual differences in behavior and physiology associate with behavioral innovation. Role: Co-investigator. PI: Corina Logan (Cambridge, UK).

The Shuar Life History, Health, and Reasoning Project is a collaborative effort involving researchers from the University of Oregon, the Shuar Federation, and the Ecuadorian Health Ministry Hospital in Sucúa, Ecuador. The project investigates Shuar health, immune function, subsistence, economy, parenting, reasoning, and demography in order to test a variety of life history predictions. Role: Co-investigator. PIs: Lawrence Sugiyama (University of Oregon) and J. Josh Snodgrass (University of Oregon). Website: <http://www.bonesandbehavior.org/shuar>

UNDERGRADUATE COURSES TAUGHT

Introduction to Biological Anthropology

An introduction to the field of biological anthropology: the study of human evolution, variation, and behavior. The pattern and process of evolution as it relates to hominins (living humans and their extinct bipedal relatives). Darwin's mechanism of natural selection, and the neo-Darwinian understanding of the process of evolution. The biology, behavior, and evolutionary trends of nonhuman primates. Hominin fossil record and examine changes in locomotion, morphology, diet, and social structure that have occurred since we last shared a common ancestor with members of the genus *Pan*. Human biological variation.

Capstone: Hormones and Human Reproduction

The role of hormones, diet, and stress in the regulation of human reproduction, behavior, and physiology. Hormonal changes with menstruation, parenting, and pregnancy. The evolution of reproduction in humans and other species.

Developmental Plasticity and Evolution

Focus on genetics, epigenetics, and cultural evolution; how organisms develop differently in different environments; how developmental plasticity facilitates evolution; adaptive landscapes; genetic accommodation of phenotypic variation; reaction norms; variation and flexibility in immune function, growth, behavior. Emphasis on humans but with examples and applicability to other species.

Reproductive Ecology and Behavioral Endocrinology

Regulation of reproductive function by diet, energy balance, lactation, and social context. The role of hormones in the regulation of human reproduction, behavior, and physiology. Hormonal changes with parenting and pregnancy in men and women.

Human Growth and Development

Analyzes human growth and development from an evolutionary and cross-cultural perspective. Life stages from birth to death are considered, and contrasted with other primates. Other topics include brain evolution, fetal programming, sexual dimorphism, senescence, immunity, play, parental care.

Evolution of Human Sexuality

Includes basic genetics, physiology, and behavior. Evolution of sex, of the sexes, and of the role of sex in mammal, primate, and human behavior.

Methods in the Human Behavioral Sciences

Introduction to study design; fields of anthropology; introductory statistics; data collection and coding; how to read and understand scientific papers

Anthropology Capstone: Preparing for a Graduate Career in Anthropology

Prepares students to apply to graduate school in anthropology, including preparation of applications for admission and fellowships such as the NSF Graduate Research Fellowship.

Anthropology Capstone: Entering the Work Force with an Anthropology Degree

Prepares students with anthropology degrees to enter the work force by discussing potential career paths. Discussions with guest lectures. Preparation of resumes and job applications.

GRADUATE COURSES TAUGHT

Evolutionary and Cultural Perspectives on Religion

This course will examine religion as a suite of human behaviors and institutions that both vary cross-culturally and contain common elements across cultures. We will examine aspects of religion such as rituals, beliefs, myths, and meditation, from a variety of scientific, ethnographic, and symbolic approaches including as the product (or byproduct) of natural selection for cognitive adaptations, as social systems that have evolved through genetic or cultural evolution, as technologies that manipulate neurophysiology, and as symbolic systems of understanding and phenomenology.

Eco-immunology

This course is an introduction to eco-immunology, the study of how ecology and immunology interact. We will cover topics such as: 1) Fundamentals of the immune system 2) How immunity trades-off with other life history demands like growth and reproduction 2) Immune strategies and trade-offs between branches of immunity 3) Host-pathogen interactions, ecology, and coevolution 4) Immune-endocrine interactions, and 5) Methods for measuring immunity

Laboratory Methods in Biological Anthropology

Graduate introduction to the laboratory methods used in human biology for analyzing blood and saliva samples to determine levels of antibodies, hormones, and other biomarkers. The focus is on hands-on training and troubleshooting assay problems.

Applied Data Analysis in R

Graduate level workshop in data analysis using the R language. Focus is on practical applications to research questions, data management, and graphing. Topics vary by participants, but may include mixed models, non-linear modeling, writing loops and functions, manipulating data, interfacing with Access databases, matrix operations, contour plots, graphing of geographical data, etc.

Contemporary Topics in Biological Anthropology

Read and discuss professional literature in biological anthropology and related fields: evolutionary and life history theory, human biology, paleoanthropology, biomedical science and

primatology. Course keeps students abreast of key developments in the field.

POSTDOCS AND RESEARCH ASSISTANTS SUPERVISED

Kelsey McCune, Postdoc 2019, Behavioral Flexibility in an Invasive Species: Functions, Mechanisms, Invasion Ecology, and Genetics

Zoe Johnson-Ulrich, Postdoc 2018, Behavioral Flexibility in an Invasive Species: Functions, Mechanisms, Invasion Ecology, and Genetics

Luisa Bergeron, Junior Specialist 2018-2019, Behavioral Flexibility in an Invasive Species: Functions, Mechanisms, Invasion Ecology, and Genetics

GRADUATE STUDENTS SUPERVISED

Michael Gaffney (WSU, PhD Committee Member)

Beatrice Caffè (WSU, MA Committee Member)

Amy Anderson (UCSB, In progress PhD Chair, 2018 MA Chair)

Carmen Hove (UCSB, PhD Committee Member, 2018 MA Chair)

Sarah Alami (UCSB, 2019 MA Committee Member)

Angela Garcia (UCSB, 2018 PhD Chair, 2015 MA Chair)

Lisa McAllister (UCSB, 2017 PhD Committee Member)

UNDERGRADUATE THESES AND RESEARCH SUPERVISED

Marilyne Tamayo (now @ U. Missouri)

Nikka Ryan Keivanfar (now @ 10X Genomics)

Sarah Bay

Michael Gaffney (now @ Washington State)

Cristina Gonzalez

STUDENT GRANTS AND AWARDS UNDER MENTORSHIP

2019	Graduate Student, Amy Anderson, NSF Dissertation Improvement Grant: “The effects of porous cranial lesions on adult health and the evidence for childhood anemia-driven skeletal changes in a living Amazonian subsistence”
2017	Graduate Student, Angela Garcia, Wenner-Gren Foundation Dissertation Grant for “Do Neuroendocrine-Immune Interactions Mediate Links between Social Disparities and Metabolic Risk among Honduran Immigrant Women?”
2017	Undergraduate, Sarah Bay, UCSB Undergraduate Slam Presentation Finalist for “Suppression or Redistribution? Effects of Acute Changes in Testosterone on the Immune System in Human Males”
2016	Undergraduate, Sarah Bay, UCSB Undergraduate Slam 3 rd Place for “Immune Function and Acute Testosterone Changes in Male Undergraduates”
2015	Graduate Student, Carmen Hove, NSF GRFP Fellowship for “Physiological, Genetic, and Environmental Interactions Influencing Fetal Tolerance”
2015	Graduate Student, Amy Anderson, NSF GRFP Honorable Mention for “Anemia in a Subsistence-Level Amazonian Population and Its Implications for Bioarchaeology”
